### 3-Year Diploma of Associate Engineering (DAE)

ADMISSION PACKAGE COST RS.500.00

**SALEEM RAZA JALBANI**  
Chairperson

It is an admitted fact that the unemployment and poverty is the foremost challenge of the country, whereas, the rapid development in the technologies and skills have re-shaped the world of work. Accordingly, several windows in the local and international labour market have opened for skilled workmen enhancing the demand & scope of skilled workforce. In fact, the competitive environment demands the high skilled workforce and confidently I can say that Sindh TEVTA having the experienced faculties and the infrastructure is equipping the thousands of youth of the Province with employable and competency based skills to fulfil the employment needs of the industry, contributed in lowering the unemployment and add value to uplift the socio economic development in the Province in particular and the country in general of Pakistan.

**Shafique Ahmed**  
Mahesar Managing

Economic Development of a country largely depends upon the level of Human Resources Development and mainly on level of technically trained labour specially the middle career management.

Our country, supposedly, is considered as a labour surplus economy with a dilemma that number of unemployed youth is increasing day in and day out. On the other side of the problem public and private sector enterprises and employers have been desperately looking for technically educated and trained workforce.

The shortage of skilled labour can be attributed to mismatch between academic curricula, market oriented skills and trainings and lack of the capability of our technical institution to produce such work force.

To encounter these challenges, Sindh TEVTA is feeling obliged to attend the best global practices intends to coup up these issues through improving efficiency of TVET administration and introducing market oriented academic Programs, trainings, and developing industrial linkages.

It is a matter of fact that globally Technical Education and Vocational Training (TEVT) is considered to be a major source of reducing unemployment and poverty. But it is also a world-wide trend that people prefer formal education as their first choice and join TVET as their last option. There is greater need to change this perception and encourage and promote technical and vocational training.

Sindh TEVTA is committed to increase the awareness level to attract more of our youth towards Technical Education and Vocational Training. This is being done by envisaging to improve our academic programs, strengthening institutional infrastructure, ensuring the transparency in admission process and imparting quality education and training.

Through centralized admission policy, the Sindh TEVTA intends to introduce transparent process of admissions with an aim to admit competent and reliable youth who can compete and deliver by contributing to public as well as private sector. The introduction of such selection process is aimed to make our graduates relatively more acceptable to the employers.

I am confident that through these efforts we will be able to attract the most suitable and competent youth towards Technical Education and improve the overall outlook of skilled youth in TVET sector and in our country.
